

## Chapter Events

Maine Woodland Owners offers forest education workshops all year round. This is a service for members and most events are open to the public. These events are organized by dedicated volunteers who serve as Chapter Leaders. Chapter-led events ensures that programming is locally-based and is responsive to the needs of the membership in the area. Below are programs that are commonly offered by the organization and its partners. Contact your [Chapter Leader](#) to find out more about upcoming programs or to request a program.

**How to sell your wood**
